Feilmelding - Application Blocked by Java Security

Denne feilmeldingen skyldes at sertifikatet fra «DIS-norge, Slekt og Data» som er brukt for å signere Java programmet er utløpt og at programmet ikke er signert med nytt sertifikat utgitt med nytt navn «Slekt og Data».

Du kan enkelt løse problemet ved å fortelle Java at det er tillatt å hente programmer med utgått sertifikater fra http://www.disnorge.no.

Oslo 10.2.2017 Nils Tollehaug java@disnorge.no Åpne Java Control Panel ¹og velg fanen Security. I Windows 10 velges listen over Programmer velg Java og velg Configure Java. I tidligere Windows versjoner startes Java Control Panel under Innstillinger og velg deretter Java. Nedenfor er et eksempel på hvordan dette skal se ut i Java Control Panel og hvordan dette gjøres:

Du kan legge inn «DISgravm» i «Exception Site List» slik:

Trykk på Edit Site List og skriv inn i feltet med **I** følgende:

<u>http://www.disnorge.no</u>. Trykk «OK». *Se eksempel nederst på siden.*

Ignorer anbefaling om bare å bruke

https og advarsel om at http linker er en sikkerhetstrussel.

Neste gang du prøver å starte «DISgravm» vil Java komme med en advarsel og spørsmål om du vil kjøre programmet. Trykk «Aksepter».

,Sjekk at navnet på sertifikatet er utgitt og tilhører: DIS-norge, Slekt og Data. Hvis du aksepterer, vil Java starte programmet. Senere vil Java programmet starte som normalt.

¹ Java Control Panel kan også startes fra C:\Programmer\Java\jre.....\bin\javacpl.exe
